YRS Facility Populations by Quarter for 2011-2013 First Quarter

YRS facility population information was obtained from YRS for admissions and release to Secure Detention, Level 5 and Level 4 facilities for calendar years 2011 through 2013 First Half. In addition to this information, YRS also provided case numbers linked to each admission and release to identify why each placement occurred.

Using YRS data provided, SAC compiled the admissions and releases, and removed all internal transfers. An internal transfer from one facility to another within the same Level is used for various reasons including case processing and safety. These are not new admissions to a facility, and should not be counted as such. For this reason, New Castle County Detention Center and Stevenson House information will be combined for the purposes of reporting population information. Many transfers occur between these two facilities. Displaying the populations by facility would not be valid as the admissions and releases would not balance with the snapshot population by facility. By combining the facilities, the complications of admission to NCCDC but release from Stevenson House or vice versa are not visible. Moreover, a word of caution is urged when comparing this quarterly data to previous provided quarterly data. The extent to which internal transfers were counted previously is unknown, and so comparisons cannot be made between current and previous reports.

To identify the reason for each placement at Secure Detention, Level 5 and Level 4, SAC used the case information provided by YRS in addition to CJIS and JIC to label each placement either a Felony, Misdemeanor, VOP, Misdemeanor and VOP, Drug Court Sanction, Failure to Appear (FTA) or Failure to Pay (FTP), Sentence Review/ Status Hearing, Administrative or Other/Unknown. The other/unknown category contains juveniles held for Truancy, Material Witness, INS detainees, no case information found for stay or no SBI information found, along with other infrequent reasons such as a judge's order. The type of stay for the years 2010 through 2013 have changed slightly from reporting on previous years due to a more in depth review of each juveniles' charges. The majority of changes occurred upon closer evaluation of the Misdemeanor/VOP category. In which the stay types were redistributed, in many cases, to either a Misdemeanor or a VOP.

The final component of this report is juvenile demographic information. Race, Ethnicity, Sex and Age are included in most sections. Race is broken into Black, White and Other. The Other category includes Asian and American Indian/Alaskan Native. These two groups were combined for the Other category because the numbers were small. Ethnicity includes Hispanic and Non-Hispanic, and is combined with Race for some tables. Sex is displayed only for Secure Detention information because these are the only mixed gender institutions. Grace Cottage, Level 4, is an all girls facility, but the other Level 5 and Level 4 treatment facilities are male only. Age at admission is displayed for each level and ranges from 9 up to 19.

Quarter Two 2013 Highlights

- The overall YRS admissions have decreased 5.6% from first quarter 2013 to second quarter 2013, and by 9.6% in comparison to quarter two of 2012.
- Overall YRS releases decreased 1.0% from first quarter 2013 to second quarter 2013, and decreased by 5.8% in comparison to quarter two of 2012.

Secure Detention

- There was a 2.8% increase in the population at the June 30, 2013 snapshot, in relation to the quarter one snapshot. However, it is down 34.9% from second quarter of 2012.
- The average daily population decreased 25.8% in quarter two of 2013 from second quarter 2012.
- Felony admissions made up 30.6% of total admissions to Secure Detention in the second quarter of 2013.
- Black non-Hispanic juveniles made up 65.3% of the admitted population.
- Male juveniles made up 73.5% of the admitted population.
- Age at admission for 89.8% of juveniles was between ages 14 and 17.
- The majority (75.2%) of juveniles spend less than 31 days detained.

Level 5 Ferris

- Admissions decreased by 15% from quarter one to two of 2013, and decreased by 9.1% compared to quarter two of 2012.
- Felony admissions made up 55% of total admissions to Ferris in the second quarter of 2013.
- Black non-Hispanic juveniles made up 75% of the admitted population.
- Average age at admission for quarter two 2013 was 16.25 years of age.
- Ninety five percent of juvenile felony releases for the first half of 2013 had a length of stay between six and twelve months.

Level 4 Cottages

- Mowlds has had a 37.5% decrease in admissions from first quarter 2013 to second quarter 2013, and an 11.8% decrease in comparison to quarter two of 2012.
- Felony admissions made up 39.3% of total admissions to the cottages for second quarter 2013, while 46.4% of admissions were for a misdemeanor, VOP or some combination of the two.
- The majority of juveniles released in the first half of 2013 had a length of stay of 61-90 days at Grace, 31-60 days at Mowlds or 3-6 months at Snowden.

The overall YRS admissions have decreased 5.6% from first quarter 2013 to second quarter 2013, and by 9.6% in comparison to quarter two of 2012. Table 1 illustrates that Secure Detention admissions have decreased 1.2% from first quarter 2013 to second quarter 2013, and by 12.8% compared to quarter two of 2012. Level 5 admissions have decreased 13%, while Level 4 admissions decreased 18.8% from first quarter 2013 to quarter two of 2013. Table 2 shows a slight decrease in overall YRS releases from first quarter 2013 to second quarter 2013, of 1.0%, and a decrease of 5.8% compared to quarter two of 2012. The next sections are grouped by Secure Detention, Level 5 and Level 4 and provide more detailed admission, release, snapshot, and demographic information.

The next three graphs show admissions, releases and the snapshot population on the last day of the quarter for Secure Detention, Ferris and Level 4 Cottages (combined) for 2011 -2013. All facilities have seen moderate increases and decreases in their admissions and releases since 1st quarter 2011. Snapshot populations for secure detention and the four cottages remained fairly steady throughout 2011 through 2013, with only a slight downward trend for the cottages in 2012.

Section 1: Secure Detention

As previously stated, Secure Detention is comprised of New Castle County Detention Center (NCCDC), a 64 bed secure facility, and William Marion Stevenson House Detention Center (Stevenson House), a 55 capacity secure facility. Both lock-secure facilities house non-adjudicated male and female youths and provide academic education, psycho-education programs, medical, dental and psychological services.

Table 3 shows a 2.8% increase in Secure Detention population at the June 30, 2013 snapshot, in relation to quarter one, however, it is down 34.9% from second quarter of 2012 . In addition, Secure Detention average daily population is down by 25.8% from quarter two of 2012 to quarter two of 2013. Prior to January 1, 2011, there were 76 juveniles in Secure Detention. Snapshot populations are a look at who was in a facility on the last day of the quarter. Second quarter 2012 houses the highest snapshot population with 3rd quarter 2011 having the greatest average daily population. Average Daily Population is presented to show a more accurate picture of the facility population for the entire quarter.

Table 3: Secure Detention Quarterly Snapshots

The following tables pertain to Secure Detention Admissions by quarter for 2011-2013 second quarter. Table 4 describes the category of offense for which the juvenile was detained. Felony detention admissions make up 30.6% of the reasons juveniles are detained. Misdemeanors make up 41.6% and VOP's contribute 21.6% of detained admissions for the second quarter 2013. The remaining detained admissions are spread among the other six categories and comprise 6.2% of detention admissions for this most recent quarter.

Table 4: Secure Detention Admissions by Offense Type

Secure Detention Admission Type	2011				2012				2013			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4

Total	268	288	274	261	244	281	286	217	248	245		

Table 5, Table 6 and Table 7 display demographic information for Secure Detention admissions. Table 5 shows that the majority of Secure Detention admissions are Black juveniles (60%-75%). Hispanic juveniles make up only 8.9% of secure detention admissions for quarter two of 2013. Table 6 illustrates that females comprise 20% to 33% of Secure Detention admissions, with a slight increase in the percentage of female admissions to 26.5% from 24.5% for the second quarter of 2013. Table 7 displays age at admission to Secure Detention. Few offenders are admitted prior to age 14. The majority, 78.4%, of juveniles admitted to Secure Detention were between 15 and 17 years old.

The final table for Secure Detention, Table 8, displays Secure Detention releases by detention type and length of stay per year. The overwhelming majority of juveniles spend less than 31 days in detention (75.2%). Of those juveniles who spend more than 31 days in detention, the detention stays are for Felony, Misdemeanor or VOP. Very few juveniles spend more than 30 days in Secure Detention for Administrative Holds or Sentence Reviews.

Section 2: Level 5 Ferris

Ferris is the YRS Level 5 facility that provides intensive rehabilitative treatment services for up to 72 male youth. Ferris saw a decrease in admissions from 1st quarter 2013 to 2nd quarter 2013 of 15%, and a decrease of 9.1% compared to quarter two of 2012. Table 9 shows snapshot populations by quarter for Ferris along with average daily population. There was a very slight increase at both snapshot and in the average daily population from 1st quarter 2013 to 2nd quarter 2013.

Table 9: Ferris Snapshot Population by Quarter

	2011				2012				2013			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4

Average Daily Population	60.8	52.8	49.8	47.4	44.8	49.8	51.4	49.2	50.7	51.6		

The next tables display information regarding Ferris admissions from 2011 to 2013. Table 10 shows the lead offense that caused the admission to Ferris by admission quarter. On average about 60% of juveniles are admitted to Ferris for Felony convictions, with some quarters as high as 75%.

Table 11 and Table 12 explain the demographic make-up of Ferris admissions. Like Secure Detention, Ferris admissions are overwhelmingly Black (70% to 90%) and Non-Hispanic (80% or more). Table 12 describes the age of juveniles admitted to Ferris, which range in age from 13 to 19 years old. The majority of juveniles admitted to Ferris are 15 to 17.

The last table for Level 5 illustrates the length of stay for offenses for juveniles released at any time during that year. Table 13 shows that the majority of juveniles spent between 3 and 12 months at Ferris for Felony convictions prior to 2012. In 2012 and the first half of 2013 the majority of juveniles spend 6-12 months at Ferris for a felony conviction. Less than 6% spend more than 1 year at Ferris for any offenses. There were 36 juveniles released from Ferris in the first two quarters of 2013, of which 61.1% had a stay associated with a felony conviction.

Section 3: Level 4 Cottages: Grace, Mowlds and Snowden

YRS Level 4 facilities include Grace Cottage, Mowlds Cottage and Snowden Cottage. Grace houses only females and has a 14 youth capacity. Mowlds Cottage, with a 16 youth capacity, houses male youth transitioning from Ferris School and short-term commitments for Aftercare supervision direct from Family Court. Snowden Cottage has a 15 male youth capacity. Table 14 shows the snapshot populations by quarter for each facility and the average daily population per quarter. Populations by cottage have remained fairly consistent with only slight increases and decreases. Mowlds shows a decrease in average daily population from 6.5 to 3.0 from first quarter to second quarter 2013.

Table14: Level 4 Snapshot Populations by Quarter

	2011				2012				2013			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
GRACE	7	11	3	9	9	4	5	12	4	5

Average Daily Population	14.8	13.8	12.1	14.5	12.9	13.3	13.0	9.5	12.6	12.9		

Table 15 shows admissions to Level 4 facility by type of offense. Mowlds has had a 37.5% decrease in admissions from 1st quarter 2013 to 2nd quarter 2013, and an 11.8% decrease in comparison to quarter two of 2012. Mowlds Cottage houses the largest number of juveniles admitted for a Felony due to the flow of youth to Mowlds from Ferris. One third of offenders admitted to Snowden in quarter two of 2013 were admitted for a Felony. The remaining juveniles were admitted to Snowden for a Misdemeanor, VOP or combination thereof.

Tables 16 and 17 display the demographic makeup of the Level 4 cottages. Table 16 shows that the majority of juveniles are Black (70% to 85%). Table 17 shows the age at admissions for each Level 4 cottage. Grace and Snowden have age at admission ranging from 12 to 19 while Mowlds ranges from 13 to 19. The majority of juveniles, for all three cottages, are between 15 and 17 years of age at time of admission.

Tables 18, 19 and 20 describe the length of stay at release by offense type for each Level 4 facility. The average length of stay at Grace for youth is 90 days, 90 days for Snowden and an average of 6 weeks for Mowlds based on YRS programming and treatment services. Length of stays for Grace and Snowden were increased from 30 days to 90 days in August 2011 to encourage more effective treatment. Since those changes have been instituted, you can see that the majority of the population for 2012 and 2013 releases from Grace and Snowden had a length of stay between 61 and 90 days or 3-6 months. Nearly 82% of juveniles released from Snowden in the first half of 2013 served from 31 days to 6 months. Approximately 36.3% of juveniles served 30 days or less at Mowlds Cottage while 63.7% served between 31 days and 6 months.

Section 4: Summary

This review provides only a cursory look at YRS populations. While the admissions, snapshot picture and average daily population numbers for each facility increase and decrease multiple times from first quarter 2011 through the first half of 2013, there do seem to be some constants. The age at admission is most likely between 15 and 17, and the admitted juvenile is more than 65% likely to be black and 80% likely to be male. Further exploration and continued in-depth analysis is required to fully understand the underlying causes with respect to this demographic information.
