## YRS Facility Populations by Quarter for 2010-2012 First Quarter

YRS facility population information was obtained from YRS for admissions and release to Secure Detention, Level 5 and Level 4 facilities for calendar years 2010 through first quarter 2012. In addition to this information, YRS also provided case numbers linked to each admission and release to identify why each placement occurred.

Using YRS data provided, SAC compiled the admissions and releases, and removed all internal transfers. An internal transfer from one facility to another within the same Level is used for various reasons including case processing and safety. These are not new admissions to a facility, and should not be counted as such. For this reason, New Castle County Detention Center and Stevenson House information will be combined for the purposes of reporting population information. Many transfers occur between these two facilities. Displaying the populations by facility would not be valid as the admissions and releases would not balance with the snapshot population by facility. By combining the facilities, the complications of admission to NCCDC but release from Stevenson House or vice versa are not visible. Moreover, a word of caution is urged when comparing this quarterly data to previous provided quarterly data. The extent to which internal transfers were counted previously is unknown, and so comparisons cannot be made between current and previous reports.

To identify the reason for each placement at Secure Detention, Level 5 and Level 4, SAC used the case information provided by YRS in addition to CJIS and JIC to label each placement either a Felony, Misdemeanor, VOP, Misdemeanor and VOP, Drug Court Sanction, Failure to Appear (FTA) or Failure to Pay (FTP), Sentence Review/ Status Hearing, Administrative or Other/Unknown. The other/unknown category contains juveniles held for Truancy, Material Witness, INS detainers, no case information found for stay or no SBI information found, along with other infrequent reasons such as a judge's order. The type of stay for the years 2010 and 2011 have changed slightly from previous reporting due to a more in depth review of each juveniles' charges. The majority of changes occurred upon closer evaluation of the Misdemeanor/VOP category. In which the stay types were redistributed, in many cases, to either a Misdemeanor or a VOP.

The final component of this report is juvenile demographic information. Race, Ethnicity, Sex and Age are included in most sections. Race is broken into Black, White and Other. The Other category includes Asian and American Indian/Alaskan Native. These two groups were combined for the Other category because the numbers were small. Ethnicity includes Hispanic and Non-Hispanic, and is combined with Race for some tables. Sex is displayed only for Secure Detention information because these are the only mixed gender institutions. Grace Cottage, Level 4, is an all girls facility, but the other Level 5 and Level 4 treatment facilities are male only. Age at admission is displayed for each level and ranges from 9 up to 19.

The overall YRS population has increased from first quarter 2010 to first quarter 2012. Table 1 illustrates that while Secure Detention admissions have increased 19.6% from first quarter 2010 to first quarter 2012, Level 5 and Level 4 admissions have decreased 22.5% and 12.8%, respectively. Table 2 shows releases from first quarter 2010 through first quarter 2012. The next sections are grouped by Secure Detention, Level 5 and Level 4 and provide more detailed admission, release and snapshot information.

The next three graphs show admissions, releases and the snapshot population for Secure Detention, Ferris and Level 4 Cottages (combined) for 2010 -2012 1<sup>st</sup> Quarter. Secure Detention and the Level 4 Cottages have seen relatively level increases and decreases in their snapshot population since 1<sup>st</sup> Quarter 2010. Ferris has had a steady decrease in their snapshot numbers from 1<sup>st</sup> Quarter 2010 through 1<sup>st</sup> Quarter 2012. The most drastic decrease being directly related to the increase in releases and decrease in admissions for 2<sup>nd</sup> Quarter 2011.

**Section 1: Secure Detention**

As previously stated, Secure Detention is comprised of New Castle County Detention Center (NCCDC), a 64 bed secure facility, and William Marion Stevenson House Detention Center (Stevenson House), a 55 capacity secure facility. Both lock-secure facilities house non-adjudicated male and female youths and provide academic education, psycho-education programs, medical, dental and psychological services.

Secure detention admissions increased 19.6% from 1<sup>st</sup> Quarter 2010 to 1<sup>st</sup> Quarter 2012. In addition, Secure Detention population increased by 16% between 1<sup>st</sup> Quarter 2010 and 1<sup>st</sup> Quarter 2012. Table 3 displays Secure Detention quarterly snapshot populations from 1<sup>st</sup> Quarter 2010 through 1<sup>st</sup> Quarter 2012 with average daily population per quarter. Prior to January 1, 2010, there were 95 juveniles in Secure Detention. Snapshot populations are a look at who was in a facility on the last day of the quarter. Average Daily Population is presented to show a more accurate picture of the facility population for the entire quarter.

Table 3: Secure Detention Quarterly Snapshots 2010-2012 First Quarter

	2010				2011				2012			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4

Average Daily Population	85.7	71.9	78.5	86.6	79.7	71.2	91.6	72.5	75.4			

The following tables pertain to Secure Detention Admissions by quarter for 2010-2012 1<sup>st</sup> Quarter. Table 4 describes the category of offense for which the juvenile was detained. On average, across quarters, felony detention admissions make up 38% of the reasons juveniles are detained. Misdemeanors make up 21.7% of detained admissions and VOP’s contribute 22%. Detained admissions involving both a Misdemeanor and a VOP comprise about 4.5% of detention admissions. The remaining detained admissions are spread among the other five categories and comprise up to 9% of detention admissions.

Table 4: Secure Detention Admissions by Offense Type

Table 5, Table 6 and Table 7 display demographic information for Secure Detention admissions. Table 5 shows that the majority of Secure Detention admissions are Black juveniles (60%-75%). Hispanic juveniles make up only 5% to 8% of secure detention admissions. Table 6 illustrates that Females comprise 20% to 33% of Secure Detention admissions, with a decrease in female admissions for the first quarter of 2012 to 18.9%. Table 7 displays age at admission to Secure Detention. Few offenders are admitted prior to age 14. The majority of juveniles admitted to Secure Detention were between 15 and 17 years old.

The final table for Secure Detention, Table 8, displays Secure Detention releases by detention type and length of stay per year. The exception being 2012, in which the numbers represent only the length of stay for those released in the first quarter. The overwhelming majority of juveniles spend less than 30 days in detention (70%). Of those juveniles who spend more than 30 days in detention, the detention stays are for Felony, VOP, or Misdemeanor and VOP offenses. Very few juveniles spend more than 30 days in Secure Detention for Administrative Holds.

Table 8: Secure Detention by Offense Type and Length of Stay

	1 Day	2-5 Days	6-10 Days	11-15 Days	16-20 Days	21-30 Days	31-60 Days	61-90 Days	3-6 Months	6-12 Months	1-1.5 Years	1.5-2 Years

**Section 2: Level 5 Ferris**

Ferris is the YRS Level 5 facility that provides intensive rehabilitative treatment services for up to 72 male youth. Ferris saw an increase in admissions from 4<sup>th</sup> Quarter 2011 to 1<sup>st</sup> Quarter 2012 of 37.5%. However, the average daily population decreased in the most recent quarter and is down drastically from 1<sup>st</sup> Quarter 2010. Table 9 shows snapshot populations by quarters for Ferris along with average daily population. The population of Ferris prior to January 1, 2010 was 80.

*Table 9: Ferris Snapshot Population by Quarter*

	2010				2011				2012			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4

Average Daily Population	77.9	68.8	59.7	59.3	60.8	52.8	49.8	47.4	44.8			

The next tables display information regarding Ferris admissions from 2010 to 1<sup>st</sup> Quarter 2012. Table 10 shows the lead offense that caused the admission to Ferris by admission quarter. On average 56% of juveniles are admitted to Ferris for Felony convictions, with some quarters as high as 70%.

*Table 10: Ferris Admissions by Admission Offense Type*

Totals	31	23	25	26	32	20	25	15	24			

Table 11 and Table 12 explain the demographic make-up of Ferris admissions. Like Secure Detention, Ferris admissions are overwhelmingly Black (70% to 90%) and Non-Hispanic (80% or more). Table 12 describes the age of juveniles admitted to Ferris, which range in age from 13 to 19 years old. The majority of juveniles admitted to Ferris are 16 or 17.

*Table 11: Ferris Admissions by Race and Ethnicity*

<i>Total</i>	31	23	25	26	32	20	25	15	24			

The last table for Level 5 illustrates the length of stay for offenses for juveniles released at any time during that year. The exception being 2012, in which the numbers represent only the length of stay for those released in the first quarter. Table 13 shows that the majority of juveniles spend between 3 months and 12 months at Ferris for Felony convictions. Less than 6% spend more than 1 year at Ferris for any offenses. There were 16 juveniles released from Ferris in 1<sup>st</sup> Quarter 2012, of which more than half (56%) had a stay associated with a felony conviction.

Table 13: Ferris Length of Stay at Release by Offense Type

	Misdemeanor and VOP					2			

**Section 3: Level 4 Cottages: Grace, Mowlds and Snowden**

YRS Level 4 facilities include Grace Cottage, Mowlds Cottage and Snowden Cottage. Grace houses only females with a 14 youth capacity. Mowlds Cottage, with a 16 youth capacity, houses male youth transitioning from Ferris School and short-term commitments for Aftercare supervision direct from Family Court. Snowden Cottage has a 15 male youth capacity. Table 14 shows the snapshot populations by quarter for each facility and the average daily population per quarter. Level 4 cottages have not seen any dramatic shifts in their snapshot numbers. Populations by cottage have remained fairly consistent with Grace showing a slight increase in average daily population, while Snowden and Mowlds show a slight decrease from 4<sup>th</sup> Quarter 2011 to 1<sup>st</sup> Quarter 2012.

*Table14: Level 4 Snapshot Populations by Quarter*

	2010				2011				2012			
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
GRACE	6	3	7	9	7	11	3	9	9			
Average Daily Population	6.3	7.4	4.3	8.3	7.3	10.0	8.1	5.4	9.3

Average Daily Population	15.4	14.5	14.7	15.5	14.8	13.8	12.1	14.5	12.9			

Table 15 shows admissions to Level 4 facility by type of offense. Grace has the most diverse admissions with 39% of the juveniles being housed for VOP, 28% for Administrative holds, and 20% for Misdemeanors from 1<sup>st</sup> Quarter 2010 through 1<sup>st</sup> Quarter 2012. Less than 10% of the overall admissions to Grace were for a Felony conviction. Mowlds Cottage houses the largest amount of juveniles admitted for a Felony (almost 36%) due to the flow of youth to Mowlds from Ferris. About 28% of offenders admitted to Snowden are admitted for a Felony from 1<sup>st</sup> Quarter 2010 through 1<sup>st</sup> Quarter 2012, with the majority of juveniles (71%) admitted to Snowden for a Misdemeanor, VOP or combination thereof.

Tables 16 and 17 display the demographic makeup of the Level 4 cottages. Table 16 shows that the majority of juveniles are Black (70% to 85%). Table 17 shows the age at admissions for each Level 4 cottage. Grace and Snowden have age at admission ranging from 12 to 19 while Mowlds ranges from 13 to 19. The majority of juveniles, for all three cottages, are 16 or 17 years of age at time of admission.

Tables 18, 19 and 20 describe the length of stay at release by offense type for each Level 4 facility. The average length of stay at Grace for youth is 90 days, 90 days for Snowden and an average of 6 weeks for Mowlds based on YRS programming and treatment services. Length of stays for Grace and Snowden were increased from 30 days to 90 days in August 2011 to encourage more effective treatment. Since those changes have been instituted, you can see that the majority of the population for 1<sup>st</sup> Quarter 2012 releases had a length of stay between 61 and 90 days, with 27% staying over 90 days. Nearly 80% of juveniles released from Snowden in the most recent quarter served from 31 days to 6 months. Approximately 35% of juveniles served 30 days or less at Mowlds Cottage while 65% served between 31 days and 6 months.

**Section 4: Summary**

This review provides only a cursory look at YRS populations. While the admissions, snapshot picture and average daily population numbers for each facility increase and decrease multiple times from first quarter 2010 through first quarter 2012, there do seem to be some constants. The age at admission is most likely between 15 and 17, and the admitted juvenile is more than 65% likely to be black and 80% likely to be male. Further exploration and continued in-depth analysis is required to fully understand the underlying causes with respect to this demographic information.
